The list of administrative units in Vietnam issued together with the Prime Minister's Decision No. 124/2004/QĐ-TTg dated July 8, 2004 and the changes updated by the General Statistics Office to date December 31, 2019)

List of ethnic groups in Vietnam promulgated together with Decision No. 121-TCTK/PPCD dated March 2, 1979 by the Director General of the General Statistics Office).

3.a. Data sources

Economic Census.

3.b. Data collection method

Indicators are collected through the Economic Census. This is a census under the National Statistical Survey Program and is specified as follows:

- Objects, investigation units: Production, business, non-business units, Party, mass organizations, associations; branches, representative offices of foreign enterprises/non-governmental organizations; non-agricultural and aquatic individual production and business establishments; religious and belief establishments.
- Survey type: Comprehensive survey combined with sample survey
- Investigation content:
 - + Group of information identifying the investigation unit;
 - + Group of information about labor and income of employees;
 - + Group information about results, costs of production and business;
 - + Information technology application group;
 - + Grouping information by subject to be assessed, depending on actual requirements;
- Information collection method:
 - + Data mining from administrative records:
 - Building a background list from administrative data sources from the Ministry of Finance (General Department of Taxation, State Treasury); Ministry of Planning and Investment (General Statistics Office, Business Registration Management Department) on the investigation unit.
 - Process, check and map data from the General Department of Taxation, the State Treasury to integrate information into the results of the Census.
 - + Collecting information for enterprises, non-business units and associations: Provide information on the website of the 2021 Economic Census. The enumerator is responsible for providing financial information, account, password for the investigation unit to log into the system and guide the information provider to fill in the information in the electronic questionnaire (web-form) on the website of the Census.
 - + For individual production and business establishments and religious and belief establishments: The investigator visits each establishment to meet the informant (the establishment owner) to interview and combine observations with the subject of the investigation. check to record all answers on an electronic questionnaire (CAPI) designed on a portable electronic device.

3.c. Data collection calendar

- Survey period and time: Cycle of 5 years, March 1 and July 1 (conducted in years ending in 1 and 6).

3.d. Data release calendar

5 years

3.e. Data providers

General Statistics Office

3.f. Data compilers

General Statistics Office

4.a. Rationale

The indicator reflects the role and position of women in economic leadership; reflects gender equality.

4.c. Method of computation

Method of computation

Công thức tính:

$$\begin{array}{c} \text{Tỷ lệ nữ giám đốc/chủ} \\ \text{doanh nghiệp, hợp tác xã} \\ \text{(\%)} \end{array} = \frac{\begin{array}{c} \text{Số nữ đảm nhiệm chức vụ giám đốc/chủ} \\ \text{doanh nghiệp, hợp tác xã} \end{array}}{\begin{array}{c} \text{Tổng số giám đốc/chủ doanh nghiệp, hợp} \\ \text{tác xã} \end{array}} \times 100$$

5. Data availability and disaggregation

Figures are available on a 5-year cycle: 2011 and 2016

Data for ethnic groups, regions only in 2016

(Published source: 2020 national report on 5-year progress towards implementation of sustainable development goals. Data from General Statistics Office)

6. Comparability/deviation from international standards

The indicator “Proportion of female directors/business owners and cooperatives” is one of the indicators reflecting the global level indicator “5.5.2: Proportion of women in managerial positions”. At the global level, it is recommended to collect this indicator through workforce surveys or modular integrated surveys of employment. However, in Vietnam, this indicator is collected through the

Economic Census and its content is narrower than that of the world, so it does not guarantee international comparability.
