

## ***0.a. Goal***

Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization, enhance innovation

## ***0.b. Target***

Target 9.2: By 2030, promote inclusive and sustainable industrialization; upgrading infrastructure and supporting industries towards sustainability, increasing resource efficiency and applying clean and environmentally friendly technologies and production processes; significant increase in employment rate and gross domestic product of industry (target 9.2 and target 9.4 globally)

## ***0.c. Indicator***

Indicator 9.2.1. The proportion of added value of the processing and manufacturing industry in the total domestic product

## ***0.d. Series***

Manufacturing value added as a proportion of GDP [9.2.1] NV\_IND\_MANF

## ***0.e. Metadata update***

June 2021

## ***1.a. Organisation***

General Statistics Office

## ***1.f. Contact mail***

54 Nguyen Chi Thanh, Dong Da, Hanoi

## ***1.g. Contact email***

banbientap@gso.gov.vn

## ***2.a. Definition and concepts***

The proportion of value added by the processing and manufacturing industry in gross domestic product (GDP) is the percentage of added value created by the processing industry compared to GDP in a certain period.

## ***2.c. Classifications***

The list of administrative units in Vietnam issued together with the Prime Minister's Decision No. 124/2004/QĐ-TTg dated July 8, 2004 and the changes updated by the General Statistics Office to date December 31, 2019)

### ***3.a. Data sources***

- Enterprise survey;
- Investigate individual business establishments.

### ***3.b. Data collection method***

The indicator is integrated and collected through 2 surveys conducted by the General Statistics Office. These are surveys under the National Statistical Survey Program, specifically:

#### ***\* Enterprise investigation***

- Investigation object, unit: Independent economic accounting corporations, corporations, enterprises/cooperatives are established and are regulated by the Law on Enterprises and the Law on Cooperatives; the grassroots units directly under the enterprise have come into production and business activities.

- Survey type: Comprehensive survey combined with sample survey

- Investigation content:

+ Number of businesses; number of employees, capital, revenue, profit, budget payment, investment capital; credit financing;

+ Assets and specialized economic information;

- Period, time of investigation: Annual cycle, March 1st.

#### ***\* Investigate individual production and business establishments***

- Subjects and units of investigation: Individual business establishments operating in all branches of the national economy (except agriculture, forestry and fisheries).

- Type of investigation: Survey of all sample combinations

- Investigation content:

+ Number of establishments and employees of individual production and business establishments;

+ Production and business results: assets, capital, revenue, budget payment;

+ Specialized information;

- Survey period and time: Annual cycle, October 1st.

### ***3.d. Data release calendar***

Year.

### ***3.e. Data providers***

General Statistics Office

### ***3.f. Data compilers***

General Statistics Office

## ***4.a. Rationale***

In Vietnam, the processing and manufacturing industry accounts for a large and increasing proportion. Therefore, this indicator is one of the important indicators to assess the level of industrialization of a country. The proportion of added value of the processing and manufacturing industry in the gross domestic product reflects the role of the processing and manufacturing industry in the economy in particular and national development in general.

## ***4.c. Method of computation***

Method of computation

Công thức tính:

$$\frac{\text{Tỷ trọng giá trị tăng thêm ngành công nghiệp chế biến, chế tạo trong GDP}}{\text{GDP}} = \frac{\text{Giá trị tăng thêm ngành công nghiệp chế biến, chế tạo}}{\text{Tổng sản phẩm trong nước}} \times 100$$

Trong đó:

$$\begin{array}{l} \text{Giá trị tăng thêm ngành} \\ \text{công nghiệp chế biến,} \\ \text{chế tạo} \end{array} = \begin{array}{l} \text{Giá trị sản xuất ngành} \\ \text{công nghiệp chế biến,} \\ \text{chế tạo} \end{array} - \begin{array}{l} \text{Chi phí trung gian} \\ \text{ngành công nghiệp chế} \\ \text{biến, chế tạo} \end{array}$$

## ***5. Data availability and disaggregation***

Annually available figures from 2010-2019

Full data by economic type and province/city directly under the Central Government have not been released.

(Published source: 2020 national report on 5-year progress towards implementation of sustainable development goals. Data from General Statistics Office)

## ***6. Comparability/deviation from international standards***

This indicator reflects part of the global SDG target 9.2.1: Manufacturing value added as a proportion of GDP and per capita.

Vietnam's data are internationally comparable.
