2.a. Definition and concepts

- Middle school graduation rate is the percentage between the number of students graduating in the last grade of a grade compared to the number of students in the final grade that are eligible for graduation.

- Middle school completion rate is the percentage between the number of students graduating from middle school in the school year ($t + 3$) to the number of students in the 6th grade at the beginning of the school year (t).

- Primary to lower secondary school transition rate is the percentage of the number of students newly enrolled in grade 6 during the school year ($t+1$) to the number of students who are recognized to have completed elementary school. school year (t).

2.c. Classifications

The list of administrative units in Vietnam issued together with the Prime Minister's Decision No. 124/2004/QĐ-TTg dated July 8, 2004 and the changes updated by the General Statistics Office to date December 31, 2019)

3.a. Data sources

Statistical reporting mode issued by the Ministry of Education and Training.

3.b. Data collection method

The Departments of Education and Training of the provinces/cities directly under the Central Government collect information on the forms: 02-TH-DN; 03-High School-DN; 02-TH-CN; 03-THCS-CN and send it to the Ministry of Education and Training to calculate the quota.

Ministry of Education and Training

4.a. Rationale

The indicator reflects the graduation level of lower secondary students, which is the basis for assessing the teaching and learning quality of lower secondary education.

5. Data availability and disaggregation

Only figures for 2019

(Published source: 2020 national report on 5-year progress towards implementation of sustainable development goals. Data from the Ministry of Education and Training)

6. Comparability/deviation from international standards

Indicator “Rate of students graduating from lower secondary school; the rate of students completing lower secondary school, the rate of transition from primary to lower secondary school” is one of Vietnam's indicators to represent the global sustainable development indicator “ **4.1. 1:** Proportion of

children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex”

However, the indicator does not guarantee global comparability because the content, scope and calculation method of Vietnam are not the same as the global standard.
