

0.a. Goal

Objective 12: Ensure a sustainable production and consumption model

0.b. Target

Target 12.2: By 2030, achieve sustainable management and efficient use of natural resources; rational exploitation and economical and sustainable use of mineral resources (global target 12.2)

0.c. Indicator

Indicator 12.2.1. Scale of land area mapped by geology and minerals at 1:50,000 scale of land

0.e. Metadata update

June 2021

1.a. Organisation

Ministry of Natural Resources and Environment

1.f. Contact mail

No. 10 Ton That Thuyet - Hanoi

1.g. Contact email

portal@monre.gov.vn

2.a. Definition and concepts

Geo-mineral mapping and mapping is geological mapping, discovery and prospecting of mineral and other geological resources; determine the current state of the geological environment and forecast geological hazards.

The ratio of land area mapped in mineral geology at a scale of 1:50,000 land part is a percentage of land area mapped in mineral geology at a scale of 1:50,000 land part over total land area. area of land.

2.c. Classifications

The list of administrative units in Vietnam issued together with the Prime Minister's Decision No. 124/2004/QĐ-TTg dated July 8, 2004 and the changes updated by the General Statistics Office to date December 31, 2019)

3.a. Data sources

Administrative data from the Ministry of Natural Resources and Environment

3.d. Data release calendar

5 years.

3.e. Data providers

Ministry of Natural Resources and Environment

3.f. Data compilers

Ministry of Natural Resources and Environment

4.a. Rationale

The indicator reflects the natural area measured, drawn, and mineral-geological mapping at the scale of 1: 50,000, serving the planning of geological basic survey of minerals, land use planning, planning traffic planning, construction planning, socio-economic development planning of the country.

4.c. Method of computation

Method of computation

Công thức tính:

$$\text{Tỷ lệ diện tích phần đất liên được lập bản đồ địa chất khoáng sản tỷ lệ 1: 50.000 phần đất liền (\%)} = \frac{\text{Diện tích phần đất liền được lập bản đồ địa chất khoáng sản tỷ lệ 1: 50.000 phần đất liền}}{\text{Tổng diện tích đất liền}} \times 100$$

5. Data availability and disaggregation

Currently, only a few years are available: 2011; 2015; 2016 and 2018

There are no published data by subgroup Provinces/Cities directly under the Central Government

(Published source: 2020 national report on 5-year progress towards implementation of sustainable development goals. Data from the Ministry of Natural Resources and Environment)

6. Comparability/deviation from international standards

This indicator reflects Vietnam's sustainable development goals (target 12.2). The set of global sustainable development indicators does not have this indicator
