2.a. Definition and concepts

Green growth is an important content of sustainable development, ensuring fast, effective and sustainable economic development and making an important contribution to the implementation of the National Strategy on climate change.

The percentage of ministries/sectors and provinces/cities directly under the Central Government that have issued a Green Growth Action Plan is the percentage of ministries/sectors and provinces/cities directly under the Central Government that have issued the Action Plan on green growth compared to the total number of ministries/sectors and provinces/cities directly under the Central Government.

3.a. Data sources

Administrative data from the Ministry of Planning and Investment

3.d. Data release calendar

Year.

3.e. Data providers

Ministry of Planning and Investment

3.f. Data compilers

Ministry of Planning and Investment

4.a. Rationale

The indicator shows the determination to implement the Green Growth Action Plan from central to local levels.

4.b. Comment and limitations

The mainstreaming of climate change into development policies, strategies, master plans and plans is institutionalized by the Government of Vietnam. The issue of climate change has been integrated into the Law on Environmental Protection, the Socio-Economic Development Strategy 2011-2020, the Socio-Economic Development Plan 2016-2020, and risk reduction policies. natural disasters, coastal zone management, energy supply and use and policies, master plans and sector development plans.

For target 13.2.1, up to now, 7/1883 ministries and 37/63 provinces/cities directly under the Central Government (59%) have developed and issued a Green Growth Action Plan with many models. deployed. Thus, the issuance of green growth plans in ministries, sectors and localities is relatively slow and needs to be promoted in the coming time to contribute to orienting the local development and growth model, ensuring the reduction of mild and timely response to climate change.

4.c. Method of computation

Method of computation

Công thức tính:

$$\frac{\text{Tỷ lệ bộ/ngành và tỉnh/thành phố trực thuộc Trung ương có ban hành Kế hoạch hành động tăng trưởng xanh (\%)}}{\text{Số bộ/ngành và tỉnh/thành phố trực thuộc Trung ương có ban hành Kế hoạch hành động về tăng trưởng xanh}} = \frac{\text{Tổng số bộ/ngành và tỉnh/thành phố trực thuộc Trung ương}}{\text{Tổng số bộ/ngành và tỉnh/thành phố trực thuộc Trung ương}} \times 100$$

5. Data availability and disaggregation

Available figures for 2020

6. Comparability/deviation from international standards

This indicator reflects Vietnam's sustainable development goals (target 13.2). The set of global sustainable development indicators does not have this indicator
