2.a. Definition and concepts

Marine protected areas in order to protect ecosystems and marine species of economic and scientific value; contributing to marine economic development, improving the livelihoods of local fishing communities in coastal areas.

Area of marine protected areas is the area of sea, islands, archipelagos and coastal areas of marine protected areas to protect marine biodiversity.

2.b. Unit of measure

ha

3.a. Data sources

Administrative data of the Ministry of Agriculture and Rural Development

3.d. Data release calendar

year

3.e. Data providers

Ministry of Agriculture and Rural Development

3.f. Data compilers

Ministry of Agriculture and Rural Development

4.a. Rationale

Indicator measuring results in the conservation, restoration and sustainable use of marine ecosystems.

5. Data availability and disaggregation

Figures available for 2014 and 2019

(Published source: Report on the implementation of sustainable development goals of the Ministry of Agriculture and Rural Development)

6. Comparability/deviation from international standards

The corresponding global SDG indicator “14.5.1: Coverage of protected areas in relation to marine areas”. However, the global indicator that determines the coverage of protected areas in relation to marine areas shows trends over time in percentages, while the Vietnamese indicator only measures the area. marine protected areas
