# 2.a. Definition and concepts

Gross domestic product (GDP) per capita is calculated by dividing GDP for the year by the average population for the respective year. GDP per capita can be calculated at current prices, in domestic or foreign currency; can also be calculated at the comparative price to calculate the growth rate.

# 2.b. Unit of measure

Billion VND

### 2.c. Classifications

The list of administrative units in Vietnam issued together with the Prime Minister's Decision No. 124/2004/QD-TTg dated July 8, 2004 and the changes updated by the General Statistics Office to date December 31, 2019)

#### 3.a. Data sources

The indicator Gross domestic product per capita is calculated from various sources, specifically:

- Gross domestic product: Data source as the data source of indicator 8.1.1;
- Population and housing census;
- Census midterm;
- Population change and family planning survey;
- The annual average VND/USD exchange rate, purchasing power parity rate announced by the General Statistics Office based on the report of the State Bank and the United Nations Statistical Organization.

### 3.d. Data release calendar

year

# 3.e. Data providers

General Statistics Office

# 3.f. Data compilers

General Statistics Office

#### 4.a. Rationale

This is one of the important aggregate economic indicators reflecting the output of production per capita in a year. Gross domestic product per capita is also an indicator used to evaluate economic development over time and internationally.

# 4.c. Method of computation

Method of computation

Page: 2 of 3

Công thức tính:

GDP bình quân đầu người tính bằng ngoại tệ được tính bằng Đô la Mỹ theo tỷ giá hối đoái (hiện hành) và tỷ giá sức mua tương đương.

Tính tốc độ tăng GDP bình quân đầu người trong năm t + 1:

Tốc độ tăng GDP bình quân đầu người trong năm 
$$t+1$$
 = 
$$\frac{(G (t+1) - G (t)}{G (t)} \times 100$$

Trong đó:

G(t+1): GDP bình quân đầu người (tính theo giá USD năm gốc) trong năm t+1;

G (t): GDP bình quân đầu người (tính theo giá USD năm gốc) trong năm t.

# 5. Data availability and disaggregation

Annually available figures from 2010-2019

(Published source: Statistical Yearbook of the General Statistics Office)

### 6. Comparability/deviation from international standards

The indicator "Gross domestic product per capita" reflects Vietnam's sustainable development goals (target 8.1), which is not included in the Global Sustainable Development Indicators
